INSTALLATION RECOMMENDATIONS

Before installing a tap, it is good to rinse the supply pipes to remove all residues. We also recommend installing the taps with a filter. The installation of the tap must be done with the surface clean and dry. To perform the water pressure test, the taps must be open.

CLEANING AND MAINTENANCE

Cleaning must be done with liquid soap and water. Do not use liquid detergents containing abrasive or acidic substances, abrasive sponges or disinfectants. Incorrect cleaning may permanently ruin the surface of taps. On color finishings, do not use products containing alcohol, acetone and other solvents.

WARRANTY

Formma guarantees all its products in case of manufacturing defects, as follows:

5 year warranty:

- Fusion or porosity defects;
- Cartridge defects (the wear of this component depends on water quality);
